

JOHN VINCENT CABALLERO

Full-Stack Product Engineer | AI & Automation Specialist

+63 905 525 5742 | jvcaballero@tuta.io | Talisay City, Cebu, Philippines |
jvcaballero.github.io/JV_Portfolio

PROFESSIONAL SUMMARY

Full-stack product engineer and AI/automation specialist across legal-services and EdTech platforms. Skilled in React/Next.js, Python/Django, PHP/WordPress, and workflow automation (n8n, OpenAI API), with a track record of shipping reliable systems as a sole engineer for fast-moving teams.

CORE COMPETENCIES

Full-Stack Engineering • AI & Workflow Automation • QA & Test Automation • Cloud & CI/CD • Database Architecture • WordPress/PHP Integrations

PROFESSIONAL EXPERIENCE

2025 – Present

Full-Stack Product Engineer | AI & Automation Specialist

Simple.biz | Remote

- Own end-to-end delivery for two client platforms, Hogan-Smith Law (legal services) and EarlyBird College (EdTech), from requirements through implementation, QA, deployment, and production support.
- **Hogan-Smith Law:** built and modernized an internal hearings & medical-records operations dashboard (Next.js, React, TypeScript, Neon PostgreSQL, Tailwind CSS, shadcn/ui, TanStack Virtual) with role/field-level permissions, virtualized tables, and audit-history views.
- **Hogan-Smith Law:** designed an event-driven Postgres/n8n sync (outbox pattern, persistent watermarks) for Google Sheets/Drive, and configured Neon PostgreSQL and **Vercel** CI/CD pipelines to reduce deployment failures.
- **EarlyBird College:** provisioned an AWS EC2 Django staging environment with a GitHub Actions CI/CD pipeline, cutting deploy time and eliminating CPU exhaustion on t3.micro, and built a companion WordPress/Lightsail pipeline with Slack deploy alerts.
- **EarlyBird College:** converted 180+ use cases into a risk-based Playwright test matrix across Student/Parent/Practitioner roles; developed a US high-school autocomplete feature and a versioned essay-content data pipeline seeding prompts across 13+ institutions.
- **EarlyBird College:** root-caused and resolved production defects in the transcript and GPA-calculation pipeline using an evidence-first workflow (logs, HAR captures, isolation tests).
- **EarlyBird College:** translated Figma mockups into a responsive, interactive UI for a new gamified coursework dashboard, wiring the full component and user-flow implementation from design handoff to production.
- **EarlyBird College:** authored comparative technical specs for React Native, Expo, Flutter, and Capacitor/Ionic to plan a desktop-to-mobile port, modeling zero-cost EAS build/OTA paths and sequencing native integrations by risk.

2024 – 2025

Senior Developer

TTEC Digital (Client: Cisco) | Remote

- Migrated internal frontend applications from Vue 2 to Vue 3, modernizing component architecture for maintainability.
- Monitored and analyzed application performance using Datadog and ScienceLogic to improve reliability and troubleshooting.
- Contributed to Cisco's QTC (Quote-to-Cash) tool configuration with custom Dynamic Apps in ScienceLogic, tailored to monitoring and compliance needs for U.S. Navy, Army, and FedRAMP clients.
- Evaluated and revitalized stale tools and dormant servers across Cisco's ecosystem (CUC/Unity Connection, CUCM/Unified Communications Manager, VMware vSphere/ESXi, UCS/Unified Computing System), running health checks, debugging, and custom Dynamic App revisions in ScienceLogic.

2021 – 2024

Full Stack Developer

BPOSeats (now HQZen) | Mandaue City, Cebu, Philippines

- Led development of a generative AI chatbot (OpenAI API, Python, DynamoDB) assisting users with Kanban card creation, saving roughly 10–20 minutes of manual effort per task.
- Refactored backend modules and optimized APIs for performance and scalability using Python/Django, Vue.js, and TypeScript; mentored junior developers on clean, maintainable implementation.
- Performed unit/snapshot testing (Jest, Factory Boy) and used New Relic to monitor system health and investigate slow queries.

EARLIER EXPERIENCE

- Technical support (TSR) and merchant/desktop support roles at Convergys, Accenture, and 24/7 Intouch (Shopify).

EDUCATION

2017 – 2020

Associate in Computer Technology

Cebu Institute of Technology - University | Cebu, Philippines

- Built foundational skills in programming, web development, and database/system administration through a hands-on curriculum.
- Balanced coursework with active freelance development work throughout the program.

SKILLS & TOOLS

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, Python, PHP, SQL
- **Frontend:** React, Next.js, Vue.js, Tailwind CSS, shadcn/ui, Figma
- **Backend & Data:** Python/Django, Node.js, REST APIs, PostgreSQL, Neon, DynamoDB
- **AI & Automation:** OpenAI API, n8n, Gemini, Claude
- **Testing & QA:** Playwright, Jest, Factory Boy
- **Cloud & DevOps:** Vercel, AWS, GCP, Docker, CI/CD, Datadog, New Relic, ScienceLogic
- **Integrations & CMS:** WordPress plugins (PHP), Sheets/Drive API, Slack, webhooks

SOFT SKILLS

- Cross-Functional Stakeholder Collaboration
- Solo Ownership & Autonomous Delivery
- Mentorship & Code Review
- Technical Documentation & Knowledge Transfer
- Ambiguity-to-Execution Translation
- Evidence-Based Problem Solving
